MANUFACTURING is the process of converting raw materials, components, or parts into finished goods that meet a customer's expectations or specifications. The manufacturing industry accounts for a significant share of the industrial sector in developed countries. The final products can either serve as a finished good for sale to customers or as intermediate goods used in the production process.

PROGRAM REPRESENTATIVES AVAILABLE ONSITE
ON-THE-JOB TRAINING - On-the-Job Training participants are given a chance to "earn and learn," developing applicable occupational skills while earning a paycheck.
