

# City of Perry Approved Emergency Access Products

## Overview

**Knox** Rapid Entry Systems are the approved products for the City of Perry and the products that are utilized provide firefighters rapid access during an emergency to **minimize potential damage caused by forcible entry** and allow the building or facility to be resecured quickly and easily after emergency operations have concluded. Other products, such as the Knox remote power box, allow firefighters to safely power down a building before entering, creating a lock-out, tag-out feature that helps prevent electrocution from inadvertent contact with energized wiring during firefighting operations. The following information applies to typical circumstances and may not address all situations.

## Authority

International Fire Code (IFC) Chapter 5, Section 501 w/Georgia amendment §501.5 as adopted by the City of Perry

International Fire Code (IFC) Chapter 5, §503.5 – 503.6 & 506.1 – 506.2 as adopted by the City of Perry

International Fire Code (IFC) Chapter 9, Sec. 912, 912.3.1 as adopted by the City of Perry

National Fire Protection Association (NFPA) 70 NEC Chapter 2, Ec. 230, 230.7 as adopted by the City of Perry

## Where Required

- Buildings and facilities equipped with a fire suppression system or fire alarm system
  - Buildings and facilities with hazardous materials or hazardous conditions as determined by the Fire Code Official
  - Buildings with elevators or high-rise buildings equal to or greater than 3 floors
  - Sites and facilities secured by manual or automatic gates or barriers
  - Other buildings and facilities as determined by the Fire Code Official
- Note: larger buildings or facilities may require multiple Knox Systems
