Re: AcuRite Weather Station Access

An AcuRite 5 in 1 Weather Station has been installed at the Public Works facility which communicates live weather information to Weather Underground and the AcuRite Dashboard App. The weather station collects rainfall, temperature, heat index, humidity, wind speed, and wind direction data as well as provides storm and wind speed alerts. By downloading the app on a smartphone or tablet, all City employees can view and access this live and historical data for our location. Download and access information is below.

MyAcuRite app download is free on Google Play and iTunes

*Create a unique login, either by department or for each individual

Apple:

Click the “Settings” tab on the bottom right

Click the “Share Weather” tab

At the bottom, click the “Follow” button

Display Name: Public Works

Device ID: 24:C8:6E:09:DE:4F

Click “Follow”

Click “Dashboard” button on the bottom left

Swipe or click at the top on the “Public Works” Dashboard

*You can swipe to the right in the Overview tab to view specific details regarding temperature, rainfall, and humidity

Android:

Click the Menu button (at the top left)

Choose the “Settings” tab

Click the “Share Weather” tab

At the bottom, click the “Follow” button

Display Name: Public Works

Device ID: 24:C8:6E:09:DE:4F

Click “Follow”

Go back to the Dashboard tab under the menu button

“Public Works” weather tab will be displayed next to the “Dashboard” tab

*You can swipe to the right in the Overview tab to view specific details regarding temperature, rainfall, and humidity

Please let me know should you need assistance or have any questions.

Thank you,

Ansley Fitzner
